

GREEN CAMPUS at UNIVERSAL PUBLIC SCHOOL

UNIVERSAL is a school that creates clean, healthy, protective and green surroundings when saving energy, environmental resources, and money.

We are in the midst of a global awakening to preserve the Earth's resources by shifting our behavior to be more sustainable and responsible.

Environmental awareness provides the people of the world with opportunities to acquire the required knowledge, skills, attitudes, and values needed to protect, conserve and improve the environment for its present and future generations.

As a responsible Green School, the inculcation of environmental awareness in all our students is of utmost importance. To develop healthy respect, love and concern for nature the students and their parents must adopt a conscious and sustainable Green Lifestyle.
